MEMORANDUM TO: Group Leaders
Area Engineers

FROM: D.E. Burwell, Jr., PE *CWB for DEB, Jr.*
State Location & Surveys Engineer

SUBJECT: Pole Data Conflicts

It has come to my attention that there have been several projects turned in to Photogrammetry in which the types of poles identified on photo classification differed from the types of poles identified in the pole data program (i.e., power poles on one and telephone poles on the other). It is important that this information match in both media. Please discuss this with your personnel and ensure that every effort is made to transmit the proper and correct information. Any errors will have to be sent back to the field office for correction.

The proper pole symbols are as follows:

-  Power
-  Telephone
-  Combination
-  Guy Pole
-  H-Frame

Thank you for your assistance in this matter. If you have questions or comments please do not hesitate to call this office or your Area Engineer for assistance.

DEB, Jr.:CWB
cc: Mr. Cecil Hinnant
